PROFICIENCIES

Working Knowledge: JavaScript (ES6), React, Node, Express, PHP, SQL, MySQL, PostgreSQL, Styled-components, Sass, HTML5, CSS3

Exposed To: Linux(Ubuntu), AWS, TypeScript, Google Cloud Platform, Fly.io, Docker, MongoDB, NoSQL, Ruby, Ruby on Rails, Mocha and Chai, Jest, Cypress, StoryBook, Figma, Jira, Agile, SDLC, Accessibility

EXPERIENCE

Full Stack Software Engineer   April 2023 – Present
Momo Gallery   *Toronto, Canada*
- Architected user-friendly custom artist portfolio platform, optimized to allow client to update site independently
- Redesigned UI from old desktop-only Wordpress site to modern responsive design site
- Iteratively improving the site through continuous incremental development, QA, and continuous integration

Web Developer(Volunteer)   October 2019 – March 2020
Connexions   *Toronto, Canada*
- Analyzed legacy PHP codebase, troubleshooting issues, and providing effective solutions
- *MySQL, PHP, Linux(Ubuntu)*

IT Analyst   June 2014 – May 2018
Tokyo University of Science   *Tokyo, Japan*
- Provided solutions and support during the system migration phase from the domestic on-premises system to SaaS (Software as a Service) cloud-based services such as Salesforce
- Customized and implemented system automation and access management to maintain **25,000 internal user accounts**, reducing the maintenance workload **by 85%**
- Implemented new Salesforce reports providing automated dashboards and reports, reducing time spent on tracking grant expenses for researchers **by 90%**
- Reduced submission process time for internal digital approvals system **from days to less than 10 minutes** with JavaScript-based workflow digitization project, through automation of manual processes and reducing human errors with automated validation
- Significantly improved user experience, reduced average cross-system login time from 90 seconds to 30 seconds by implementing in-house Single Sign On (SSO), supporting seamless login for three cloud system (Azure, Salesforce, Box), saving users an aggregate of **100 hrs/day**
- *JavaScript, PHP, MySQL, Salesforce, box*

PROJECTS

Little Libraries | Live Demo | Client Repo | Sever Repo   November 2022
- Collaboratively document "Little Libraries" with photos and geolocation data: secure login, search, and multiple views
- *React, Node, Express, JWT, PostgreSQL, Google Maps API, Firebase Cloud Storage, Netlify, Fly.io*

Ace the Interview! | Live Demo | Client Repo | Sever Repo   September 2022
- Responsive and configurable app for job seekers to practice their interview skills optionally under time constraints
- *React, Node, Express, MongoDB*

EDUCATION

Lighthouse Labs, Full stack web development   October 2021 – January 2022
Diploma of Web Development   *Toronto, Canada*

Nihon Engineering College
Diploma Concert and Event Production   *Tokyo, Japan*

CERTIFICATIONS

Certified Linux Administrator LPIC-1   June 2021
Linux Professional Institute   *Toronto, Canada*
- Linux system architecture, server and networking configuration, system security, and routine maintenance
